

NAME

chop_filetype

SYNOPSIS

remove a filetype from a filename

USAGE

```
local df = require "lib/dtutils.file"
```

```
    local result = df.chop_filetype(path)
```

```
    path - string - a filename with or without a path
```

DESCRIPTION

chop_filetype removes the filetype from the filename

RETURN VALUE

result - string - the path and filename without the filetype
