NAME
file_copy

SYNOPSIS
copy a file to another name/location

USAGE
local df = require "lib/dtutils.file"

local result = df.file_copy(fromFile, toFile)
  fromFile - string - name of file to copy from
  toFile - string - name of file to copy to

DESCRIPTION
copy a file using a succession of methods from operating system
to a pure lua solution

RETURN VALUE
result - boolean - nil on error, true on success
